ALABAMA 911 BOARD

WHEN

Wednesday, November 15, 2023
1 – 4 PM

WHERE

Gulf Shores Fire Station 1
1921 W 1st Street,
Gulf Shores AL 36542

WHO SHOULD ATTEND

If you work in, supervise, manage, or provide technology support for the operations of a PSAP, this training is for you.

Cybersecurity Standards and Policy Creation Workshop for 911 Professionals

In the face of an ever-evolving digital landscape, the Cybersecurity Standards and Policy Creation Workshop aims to equip 911 professionals with the essential tools and knowledge to safeguard emergency communications. This workshop will delve into an in-depth understanding of cybersecurity standards and controls. It will cover fundamental cybersecurity protocols and methodologies, including modern encryption technologies, intrusion detection systems, secure network design, and more.

Our goal is to empower 911 professionals to develop robust cyber policies, aligning them with these critical standards and controls. We will address policy creation from a practical perspective, focusing on the unique challenges faced by emergency communication systems. Participants will learn to craft policies that anticipate potential threats, mitigate risks, and ensure the continuity and reliability of their services.

In addition, we will explore best practices in implementing and maintaining these policies, fostering a culture of cybersecurity within the organization. This includes awareness training, regular audits, and incident response planning.

This workshop is designed to be both comprehensive and engaging, with a blend of theoretical discussions, case studies, interactive sessions, and group exercises. It is an invaluable resource for 911 professionals committed to building a safer, more secure digital environment for their critical services.
