➤ GIS Report

- ❖ We still have six ECDs that have never aggregated their GIS data to the statewide VEP
- ❖ Anderson will be visiting each of these districts over the next month to assist them with doing this.
- ❖ If the data is not aggregated by the end of the calendar year, the Board authorized the staff to send certified letters to those districts outlining the process and explaining the consequences of inaction

- It is important to add the step of frequent aggregation of your GIS data to the statewide VEP to your workflow
- The map to the left shows the last aggregation of ECDs across the state and the majority of them occurred over 6 months ago
- This indicates that local location data in most of the state is not up to date
- The data in the statewide VEP is used for both call delivery and in the RapidSOS Premium product
