

### March 20, 2024 Board Meeting Montgomery, Alabama

Alabama 9-1-1 Board

## Board Meeting Agenda

#### **Introduction**

- ✤ Call to Order
- Roll Call
- ✤ Agenda Approval (Tab 1)
- Minutes Approval (Tab 2)
- ✤ Guest Introductions

### **Programmatic Reports**

✤ Finance (Tab 3)

- Education & Outreach (Tab 4)
- Technology (Tab 5)
- ✤ Governance (Tab 6)

### **Closing**

- ✤ Old Business (Tab 7)
- ✤ New Business (Tab 8)
- Public Comments
- Next Meeting
- \* Adjournment

## Finance

TAB 3

Alabama 9-1-1 Board

## Finance

- Financial Statements
- Legacy Cost Reimbursements
- Cost Recovery Update for FY23
- **\*** Examiner's Final Billing for ECD Audits
- **\*** Distribution Overview
- Prior Grant Cycles Updates

#### Statement of Revenue and Expenses - Modified Cash Basis Total Funds

For five months ending February 29, 2024

ANGEN 2.0 Report for January 1 – February 29, 2024

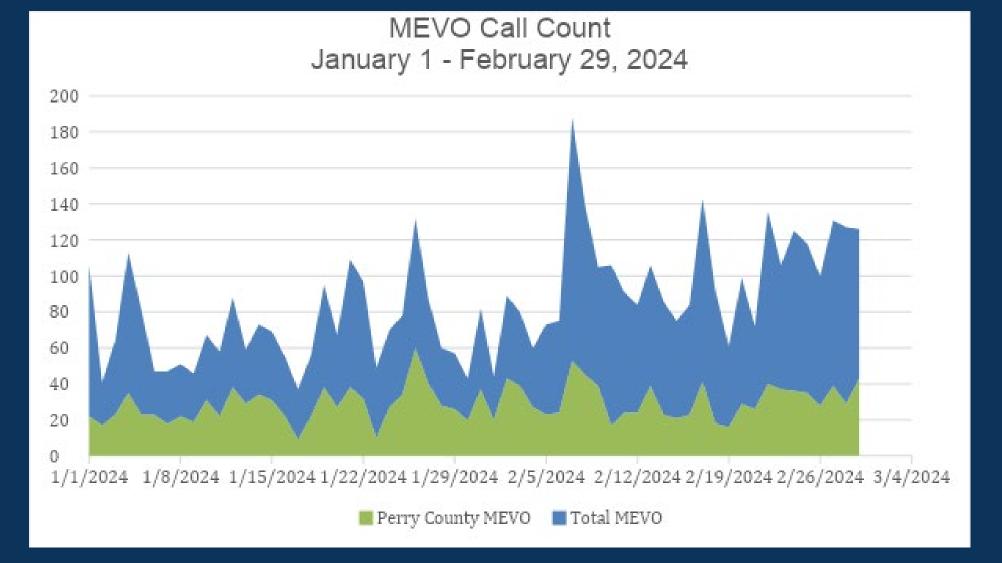

## **ANGEN** Improvements - MEVO Feature

Updates With the help of a couple of our State Board Staff, Morgan County PSAP was updated on January 25, 2024, with the new MEVO features.

The new features include a barge, monitor and position transfer feature allowing MEVO the same functionality as PSAPs call handling equipment. Also added to the MEVO phone is a visual map display for 911 calls as well as a One Time Password for Texty authentication.

Lauderdale Limestone Jackson Madison Colbert Lawrence Morgan Franklin DeKalb Marshall Cherokee Winston Marion Etowah Cullman 😪 IT San Blount Walker Calhoun Lamar St. Clair Jeffersor Favette Cleburne Tuscaloosa Talladega Randolph Pickens Clav □ \_\_\_\_\_Tallapoosa Bibb Coosa Chambers Greene Chilton Hale Perry Sumter Elmore Autauga Dallas Russe Marengo Montgomer Lowndes Bullock Choctaw Wilcox Barbour Pike Butler Clarke Crenshaw Monroe Henry Washington Conecuh Dale Coffee Covinaton Houston Escambia 🏂 Geneva Mobile Baldwin **MEVO Feature Roll Out** Status Update Complete/Tested As of 03-08-24

3,346 total MEVO call count with an average of 56 per day. Increase of 780 from last reporting period.

\*Perry County operates solely on MEVO.

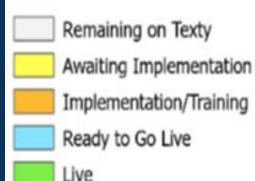

## ANGEN Improvements - Prepared

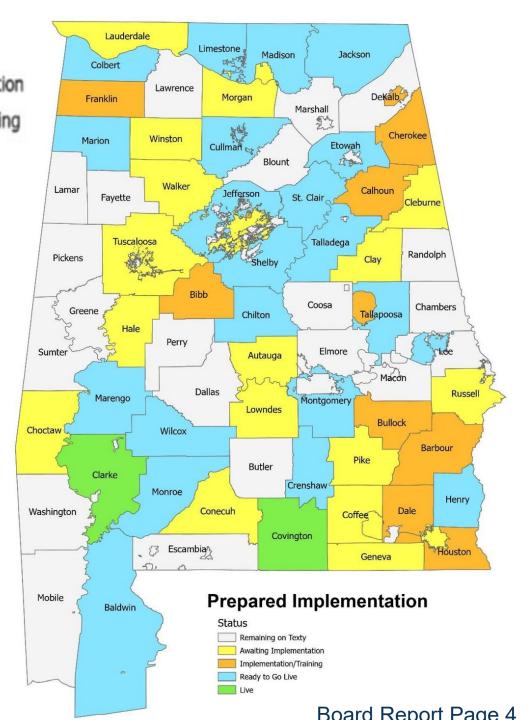

INdigital is proud to partner with Prepared to enhance 911 centers with video and MMS.

- Funded through the existing agreement between the state of Alabama and INdigital
- Optional upgrade that mimics Texty's functionality with the addition of video streaming.

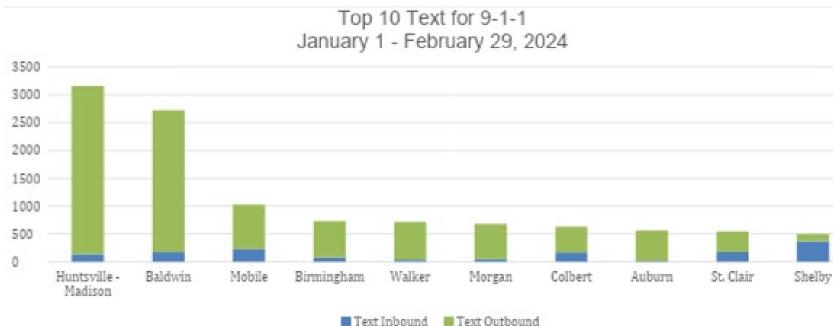

Special thanks to Covington County and Clarke County for participating in extensive testing of the features and interoperability.

Covington and Clarke were turned up live on Prepared following successful testing on March 11, 2024.

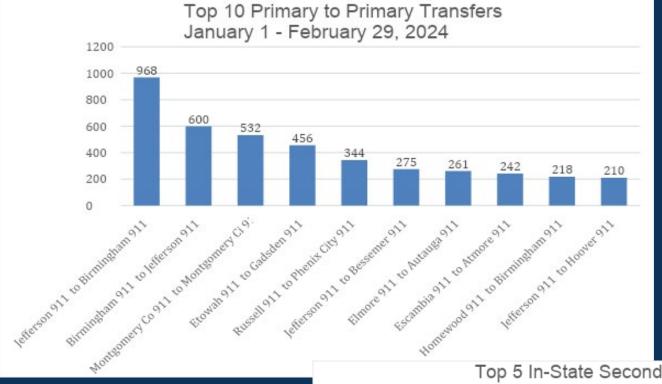

## **Texty Stats**

INdigital

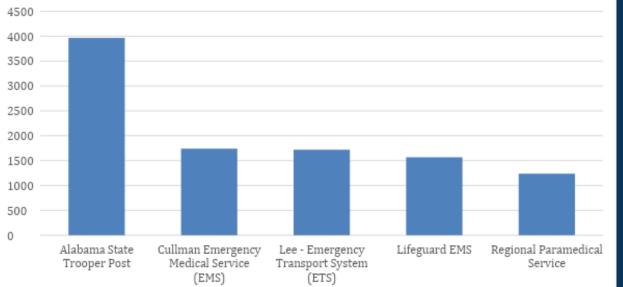

- There was a total of 3,142 inbound and 12,983 outbound text sessions for the reporting period.
- 81% of all text sessions were PSAP initiated.

There were 15,531 Primary to Primary PSAP transfers for the reporting period.

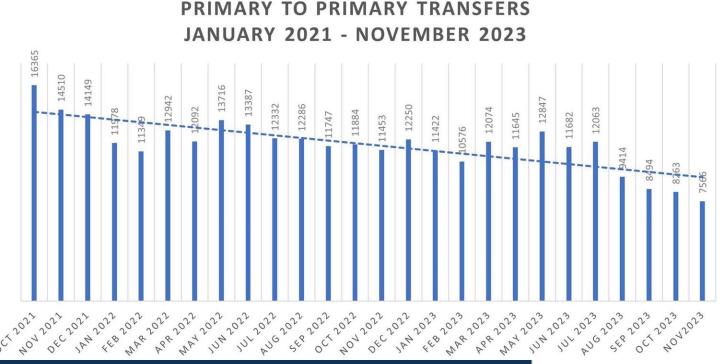

1.5 % decrease from the last reporting period.

Top 5 In-State Secondary Transfers January 1 - February 29, 2024

Lifeguard EMS and Regional Paramedical Service do not have connectivity to the ANGEN network

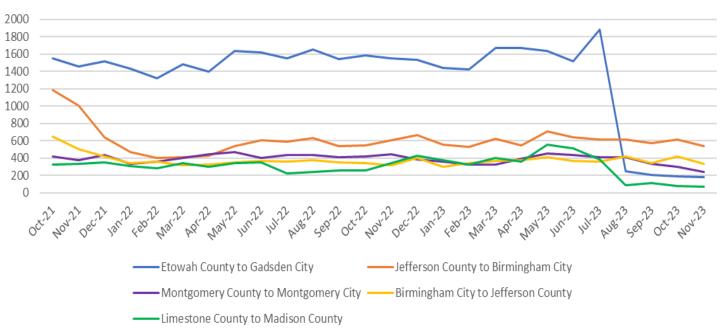

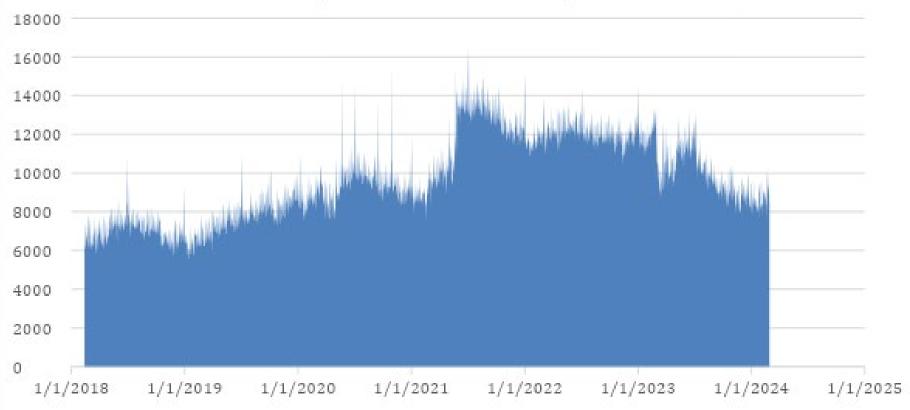

### In November of 2021, we turned up geo-routing in the state of Alabama for the fourteen PSAPs in Jefferson County.

Top 5 Decreases in Primary to Primary Transfers

In September of 2023, we completed state-wide geo-routing for the remaining PSAPs in Alabama. From the start of this project in 2021 to its completion, we've decreased primary-toprimary transfers by almost 50%

#### ANGEN Total Call Count February 12, 2018 - February 29, 2024

### ANGEN has now processed over 21.4 MILLION calls!

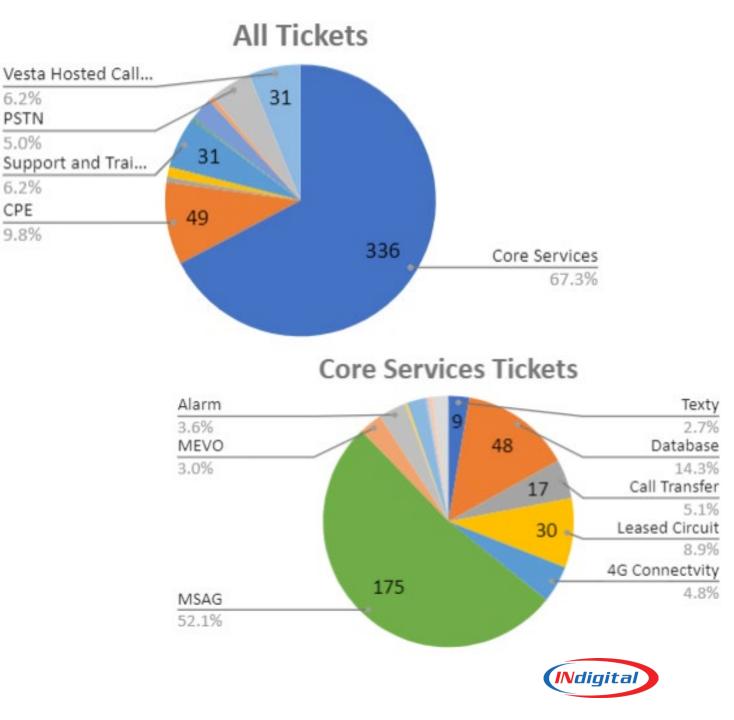

Total Call Volume for February 12, 2018 – February 29, 2024: 21,483,603

## Trouble Ticket Analysis

A total of 499 tickets have been created since the last report.

67% of those tickets were core services related.

## **RPSS Support**

The RPSS support number (256) 279-0082 will now be answered by INdigital's National Service Operations Center (NSOC) 24/7/365 instead of only on nights and weekends. The NSOC will be responsible for receiving and processing all RPSS-related inquiries.

Here's how the new workflow will operate:

- 1. Initial Contact: When you call the RPSS support number, your call will be directed to the INdigital NSOC.
- 2. Ticket Creation: The NSOC will create a ticket in Team Support to document and track the details of your request.
- 3. Assignment to RPSS Technician: After creating the ticket, the NSOC will assign it to a dedicated RPSS technician who will resolve the issue.

This change fosters closer alignment between INdigital and RPSS and ensures a more streamlined and efficient process for promptly resolving tickets and service requests.

PSAPs were notified via Texty Messenger and Email

## **INdigital Joins Forces with Novacap**

INdigital has been acquired by <u>NOVACAP</u>, a leading private equity firm specializing in telecommunications. This exciting development will sustain and elevate our commitment to serving PSAPs. Importantly, the original telephone companies that are integral to INdigital's success will remain significant shareholders. We want to ensure that you know that all management and employees will remain the same, emphasizing our unwavering dedication to the continuity and excellence of our services.

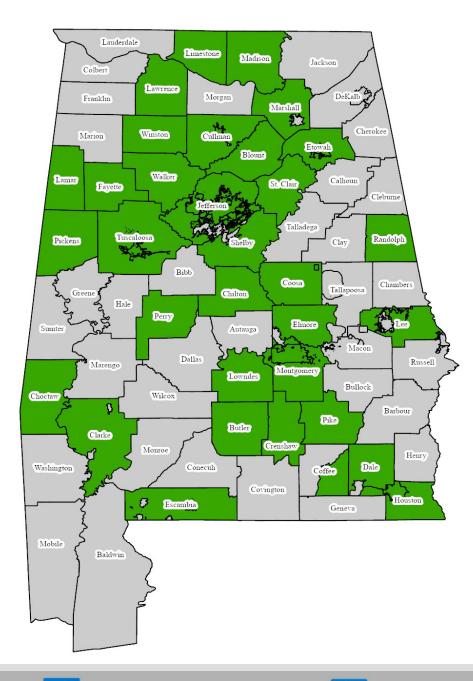

Our name will stay unchanged, reinforcing our commitment to consistency and reliability. This strategic partnership with Novacap is a testament to our commitment to improving Next-Generation 911. The investment received will empower us to refine our products and services continually. We firmly believe that what is considered good today can be even better tomorrow, and that's why we are excited about the future with INdigital and Novacap.

## Supporting RapidSOS Premium Portal Deployment

- Created an address geocoder for use in displaying call location indicators and location validation that uses our local ECD address point information
- > Working with DATAMARK and RapidSOS we created a functional basemap using local authoritative GIS data as the backbone of the heads-up display
- Completed the roll-out plan starting with Morgan County
- Full deployment has begun dependent upon ECD data readiness
- Local GIS data remediation becomes critical to allow these functions to work
- > MSAG and ALI synchronization to GIS are paramount for a successful instance
- GIS data updates will be passed to Premium Portal via the State's aggregated dataset within VEP
- Requires ECDs to regularly utilize VEP to upload, validate and aggregate GIS data

## Using Locally Authoritative **GIS Data Matters**

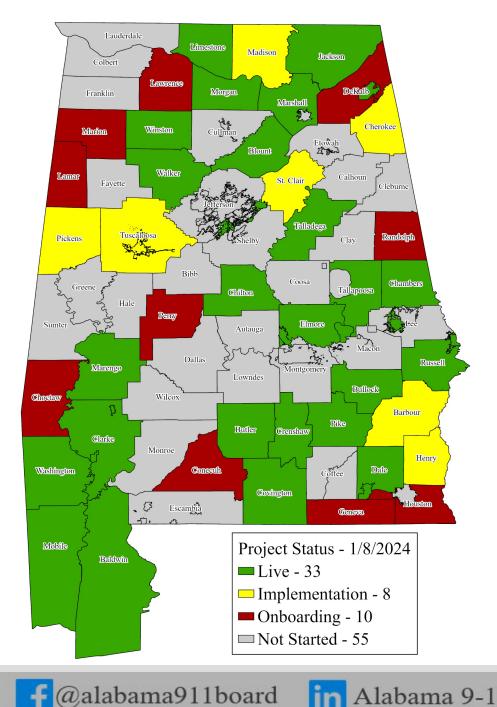

Google and ESRI are not the data creators. The most accurate data comes from the ECD and their GIS data inside VEP.

#### NIDA's WORKFLOW & ACCOMPLISHMENTS

#### □ MSAG/ALI to GIS Data Synchronization Steps

- Populate the ESN & MSAG Community Field to Address Points & Road Centerlines
- Compared the MSAG records to Road Centerlines based on the anomalies within the markup table and the same process to ALI & AP
- Forwarded lists to the ECDs for verification, and this process continues until the desired goal achieved. [If the ECD does not respond, the process becomes pending]
- Submitted tickets to INdigital for MSAG information changes
- Uploaded the updated MSAG manually to the VEP

#### Provide Technical Support

- ➤ Assisting ECDs with their queries and any GIS related issues
- Recently, assisting Blount County in assigning address and other GIS related tasks until the Datamark started their contract

#### **Data Maintenance**

Updated the GIS layers for those ECDs who regularly submitted their updated data

#### **Data Editing**

- Editing the AP & RCL geometry for some ECDs. [Geometry accuracy is not part of the validation engine; it maybe correct in the attribution, but the geometry is far off in the real world.
- Populate the fields to comply the NENA standards
